Directorate-General for Informatics

TESTA - 20 years of history

January 2021

Agenda

1. Brief introduction to TESTA
 - a) Objectives & Mission
 - b) A brief history
 - c) Who is connected today ?
 - a) Multiple communities of interests
 - b) Current Eurodomain Clients / Profiles
 - d) Why using TESTA today ?
 - e) Benefits for You
 - f) TESTA Success Stories?
2. Basics on TESTA Eurodomain Network
3. Where to find information over TESTA?

Brief introduction to TESTA

EC Digital Strategy

Building Blocks

TESTA

the underlying secured communication infrastructure

VISION

consolidated, secure
and pan-European
networks.

*Saving
time*

*Saving
costs*

*Improving User
Experience*

“**TESTA** is meant for **sensitive pan-European information exchange** between public authorities requiring guaranteed service levels for **network availability, performance** and/or **security** (confidentiality, integrity, authentication, availability).

Brief introduction - TESTA Objectives & Mission

TESTA Objectives

The TESTA network born on the initiative the Member States in the context of IDA programme and is now a solution supported by the ISA² programme as key and generic interoperability enablers.

TESTA (**Trans European Services for Telematics between Administrations**) is a communication platform to exchange electronic data between European and Member States administrations in a secure, reliable and efficient way.

The **mission** of TESTA is to

Facilitate cooperation between public administrations in various policy areas

Consolidate existing networks by providing a secure, reliable and flexible communication service layer

Brief introduction – A brief history...

Brief introduction – Multiple communities of interests

Brief introduction – Current EURODOMAIN Clients / Profiles

TESTA supports many clients...

Member States Countries

- 27 MS
- + UK

EFTA Countries

- NO
- IC
- LIE
- CH

10 Institutions

- EP BRU/LUX
- EC BRU/LUX
- SGC

Supporting the
information systems
which allow:

- The fight against **money laundering**
- **Free movement** of people
 - cross-border exchange of **health data**

DIGIT D3 available solutions: TESTA managed services, our response to the challenges of trust

PUBLIC ADMINISTRATIONS

Exchange data

Cooperate

- TESTA is the **TRUSTED** solution endorsed by the Member States.
Member States are mutually confident to develop and support digital public services using TESTA.
- ⌘ TESTA is meant for sensitive pan-European information exchange between public authorities requiring **guaranteed service levels** for network **availability, performance and/or security** (confidentiality, integrity, authentication, availability).
- ⌘ TESTA allows **multi domain policies** cross-border trusted exchange of information between Member States and EU Institutions.
- TESTA infrastructure has been **built** to be subject to a **security accreditation** process to allow the exchange of EU classified information up to the "RESTREINT UE" level.

How is TESTA of benefit to you ?

As a Public Authority

Allows the Member States to **work together** more effectively through **effective & better cooperation** between national authorities.

Facilitates cross-border and cross-sectoral **cooperation** between public administrations in **various policy domains** and in the context of **non-Community projects**.

Creates interoperability at the EU level through shared **generic solutions** and **consolidates** existing parallel networks by providing a secure, reliable and flexible building block.

Offers **significant reduction in complexity** in terms of setup, infrastructure and service management for the Member States.

Guarantees the same overall service level between all administrations thanks to the mandatory signature of a **Memorandum of Understanding (MoU)** with the Commission DIGIT.

Offers a contractual advantage as contractual arrangements are **centrally regulated by the Commission** which manages TESTA Framework Contract.

As a user, you have access to:

A **dedicated and private infrastructure – separated from the Internet**, available to all EU Institutions, EU Agencies and National and European public administrations.

A **proven and mature secured infrastructure** for the exchange of non-classified information or for **highly sensitive data in terms of confidentiality and integrity classification**.

A central **helpdesk** located on the European Union territory that can be reached on a **24/7 basis, 365 days** a year via phone, mail and web portal and offering a dedicated service approach, with personalized communication, handling incident and reporting.

Project management and service management facilitating a **quicker go-to-market** as no need to build know-how with teams.
